Quality Training: Aseptic Production

Liquid Consulting

Course flyer

This quality course covers the theory and background of aseptic production. It gives attendees the information, tools and references they need, and explains what is required to succeed with aseptic performance.

WHO SHOULD ATTEND

Attendees

Plant staff: operators, supervisors, production leaders, maintenance, QA/QC and project team members. Mixed groups of these roles can be useful for discussion. Commissioning, project and quality engineers who support aseptic plants may also attend.

Prerequisites

A basic understanding of dairy products and equipment.

Duration and languages

Two-day agenda. English and Spanish.

Request training

Use the form on liquidconsulting.com/training/aseptic-production/ or write to automation@liquidconsulting.com.

MODULES

Day 1
